

SFINCS Fortran v3 vs sfincs_jax cold/warm CPU/GPU: all audited example-suite cases

■ SFINCS Fortran v3
 ■ sfincs_jax CPU cold
 ■ sfincs_jax CPU warm
 ■ sfincs_jax GPU cold
 ■ sfincs_jax GPU warm

Cold = first external suite command. Warm runtime = jax_runtime_s_warm when present, otherwise CLI jax_logged_elapsed_s.
 Warm memory uses the recorded peak-RSS field unless a future report provides separate warm RSS.
